

Giovanni Rinaldi

Short Biography

Giovanni Rinaldi is the director of the Institute on System Analysis and Compute Science (IASI) of the Italian National Research Council (CNR) [2014-2020, 1998-2009]. He is the Research Director of the Italian National Research Council (CNR) since 1991. He took a Master degree in System Science at the Engineering School of the Sapienza' University of Rome [1976] and held a Tenured position (Researcher) at IASI-CNR [1982-1991]. Visiting Professor at the New York University and at the universities of Augsburg, Cologne and Heidelberg, IBM T.J. Watson Research Center. His research interests concern Combinatorial Optimization, in particular the study of structural properties of hard problems and in their exploitation to design efficient exact algorithms and his favorite problems are the Traveling Salesman, the Vehicle Routing and the Max-Cut Problem
